Professional Summary

MCA student with hands-on experience building machine learning classification and time-series models (Random Forest, LSTM) and full-stack web applications using Django. Proficient in Python, Pandas, NumPy, scikit-learn, and SQL, with a focus on data preprocessing, feature engineering, and model evaluation.

Education

Master of Computer Application (MCA) <i>K K Wagh Institute of Engineering, Nashik</i>	2026–2027 CGPA: 8.50
Bachelor of Computer Science (BCS) <i>K V N Naik College of Arts, Commerce and Science, Nashik</i>	2025 CGPA: 8.76
Higher Secondary Certificate (12th Science) <i>S. G. Patil College, Sakri, Maharashtra</i>	2022 76.50%

Internship Experience

Python Full Stack Intern <i>Kiran Academy</i>	Sep 2025 – Feb 2026 <i>Pune, Maharashtra</i>
- Completed hands-on training in Python full-stack development (Django, MySQL) and Data Science fundamentals, applying concepts through independent ML and web development projects. - Built practical proficiency in backend development, database integration, and data preprocessing workflows using Python, Pandas, and NumPy.	

Projects

Smart Expense Tracker <i>Python, Django, MySQL, HTML5, CSS, JavaScript</i>	May 2026 – Present
- Developing a web-based expense management system for recording transactions and monitoring daily spending through dashboards. - Implemented database-driven expense management using Django and MySQL with PDF report generation.	
Employee Churn Prediction Model <i>Python, Pandas, NumPy, scikit-learn</i>	Nov 2025 – Dec 2025
- Built a classification model to predict employee attrition using an HR dataset of 7,043 records, applying preprocessing, feature engineering, and EDA. - Trained and compared Logistic Regression and Random Forest models; achieved 79% overall accuracy, with 0.64 precision and 0.48 recall on the churn class, identifying class imbalance as a key challenge.	
Stock Price Prediction System (LSTM) <i>Python, TensorFlow/Keras, Pandas, scikit-learn, Matplotlib</i>	Jan 2026 – Feb 2026
- Built an LSTM-based time-series model to forecast stock prices using 2,768 rows of historical market data, with preprocessing, normalization, and sequence windowing. - Achieved MAE of 4.36 and RMSE of 31.60 over 17 training epochs; visualized actual vs. predicted trends using Matplotlib.	

Technical Skills

Programming: Python, Java, JavaScript
Machine Learning: Classification, Regression, Time-Series Analysis (LSTM), Data Preprocessing, Feature Engineering, EDA, Model Evaluation
Libraries / Frameworks: Pandas, NumPy, scikit-learn, TensorFlow/Keras, Matplotlib, Django
Web / Database: HTML5, CSS, JavaScript, MySQL
Tools: Git, GitHub, Object-Oriented Programming

Achievements

- 2nd Rank, Bachelor's Degree (BCS), K V N Naik College – August 2025
- 2nd Rank, LogicHunt Competition (DSA – Arrays & Strings), Abacus Club, MCA KKWIEER – December 2025
- 50 Days Badge on LeetCode – July 2026

Leadership & Extracurricular Activities

- Event Coordinator**, ACE Club – Mar 2026: Coordinated team members and ensured smooth execution and active participation in technical events.
- Event Co-Head**, Technophilia – Jan 2024: Led planning and execution of technical events, coordinated team members, and managed activities within timelines.
